Department Update

DeIDOT

Excellence in Transportation

Every Trip. Every Mode. Every Dollar. Everyone.

▶ **Every Trip**

- We strive to make every trip taken in Delaware safe, reliable and convenient for people and commerce.

▶ **Every Mode**

- We provide safe choices for travelers in Delaware to access roads, rails, buses, airways, waterways, bike trails, and walking paths.

▶ **Every Dollar**

- We seek the best value for every dollar spent for the benefit of all.

▶ **Everyone**

- We engage and communicate with our customers and employees openly and respectfully as we deliver our services.

DeIDOT's FY2020 Initiatives

- ▶ Creation of Cooperative Automated Transportation Section
- ▶ Expanding DMV and DTC Customer Service
- ▶ Increase efforts regarding Anti-Dumping/Anti-Littering
- ▶ Continue efforts with Pedestrian Safety Council
- ▶ Five Points Working Group Continuation
- ▶ Utility Coordination Working Group

MAKING **JOBS** A PRIORITY

TIIF Transportation Infrastructure Investment Fund

Providing economic assistance to the Department of Transportation for renovation, construction, and other improvements to roads and infrastructure.

TIIF Goals:

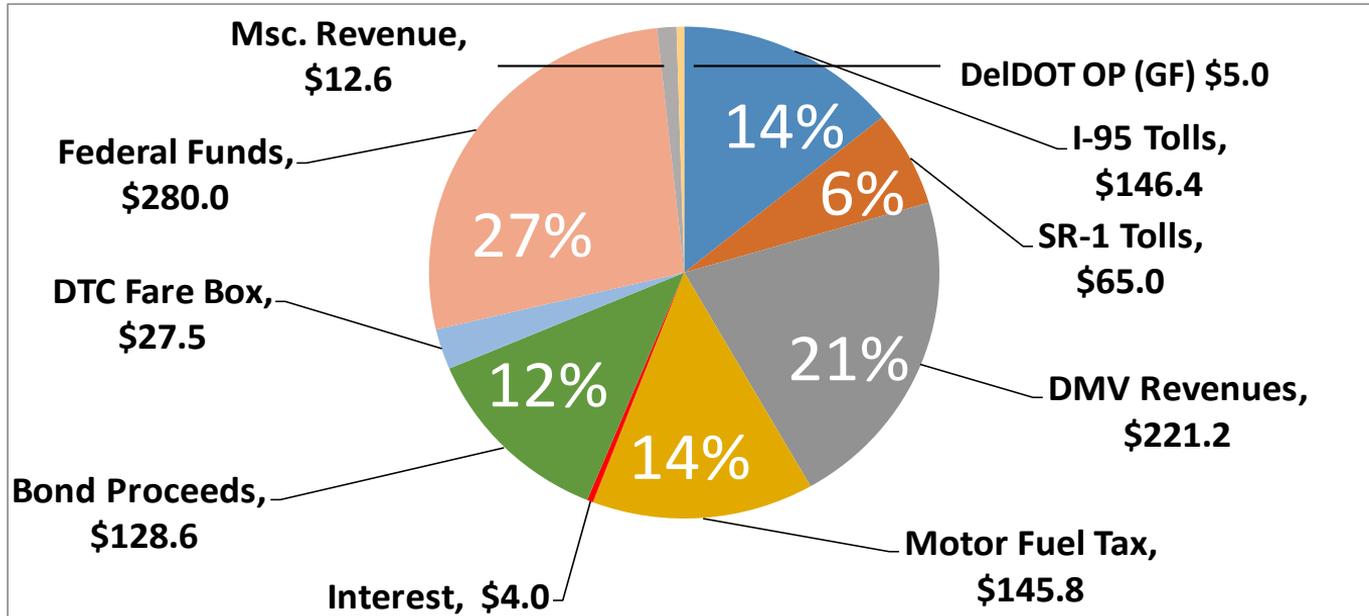

- **Attract new businesses to Delaware**
- **Expand existing Delaware businesses**
- **Create jobs**

Project Prioritization Criteria

DeIDOT

Prioritization Criteria

▶ Proposed Quantitative Criteria (77.2%):

- Safety (35.0% from 33.0%)
- System Operating Effectiveness (19.1% from 24.8%)
- Revenue Generation/Economic Development/Jobs & Commerce (13.1% from 7.9%)
- Social and Health Elements (3.9%)
- State and Local Priority (6.1% from 5% of System Preservation)

▶ Proposed Qualitative Criteria (22.8%):

- Multi-Modal Mobility/Flexibility/Access (11.9%)
- Impact on the Public/Social Disruption/Economic Justice (4.3% from 7.2%)
- Environmental Impact/Stewardship (6.6% from 6.5%)

▶ Current Quantitative Criteria (70.7%):

- Safety (33%)
- System Operating Effectiveness (24.8%)
- Revenue Generation/Economic Development/Jobs & Commerce (7.9%)
- System Preservation (5%)

▶ Current Qualitative Criteria (29.3%):

- Multi-Modal Mobility/Flexibility/Access (15.6%)
- Impact on the Public/Social Disruption/Economic Justice (7.2%)
- Environmental Impact/Stewardship (6.5%)

Social Determinants of Health (SDoH)

“State innovation models are exploring connections among health care, social services, . . . **transportation,** housing, and food with the assumption that outcomes and cost will improve.

How does TREDIS work?

- Travel demand models may show changes in traffic volume, vehicle-miles of travel, vehicle-hours of travel and volume/capacity ratio.
- TREDIS translates such changes into effects on **costs, reliability, safety and traffic volumes.**
- It incorporates the full industry structure of IMPLAN - an economic input-output model of industry relationships among producers, consumers, and institutions for any given region.

Supply Chain Analysis

- Commodity flows and industry dependence
- MAP-21: Economic context of freight transportation planning

TREDIS Precision

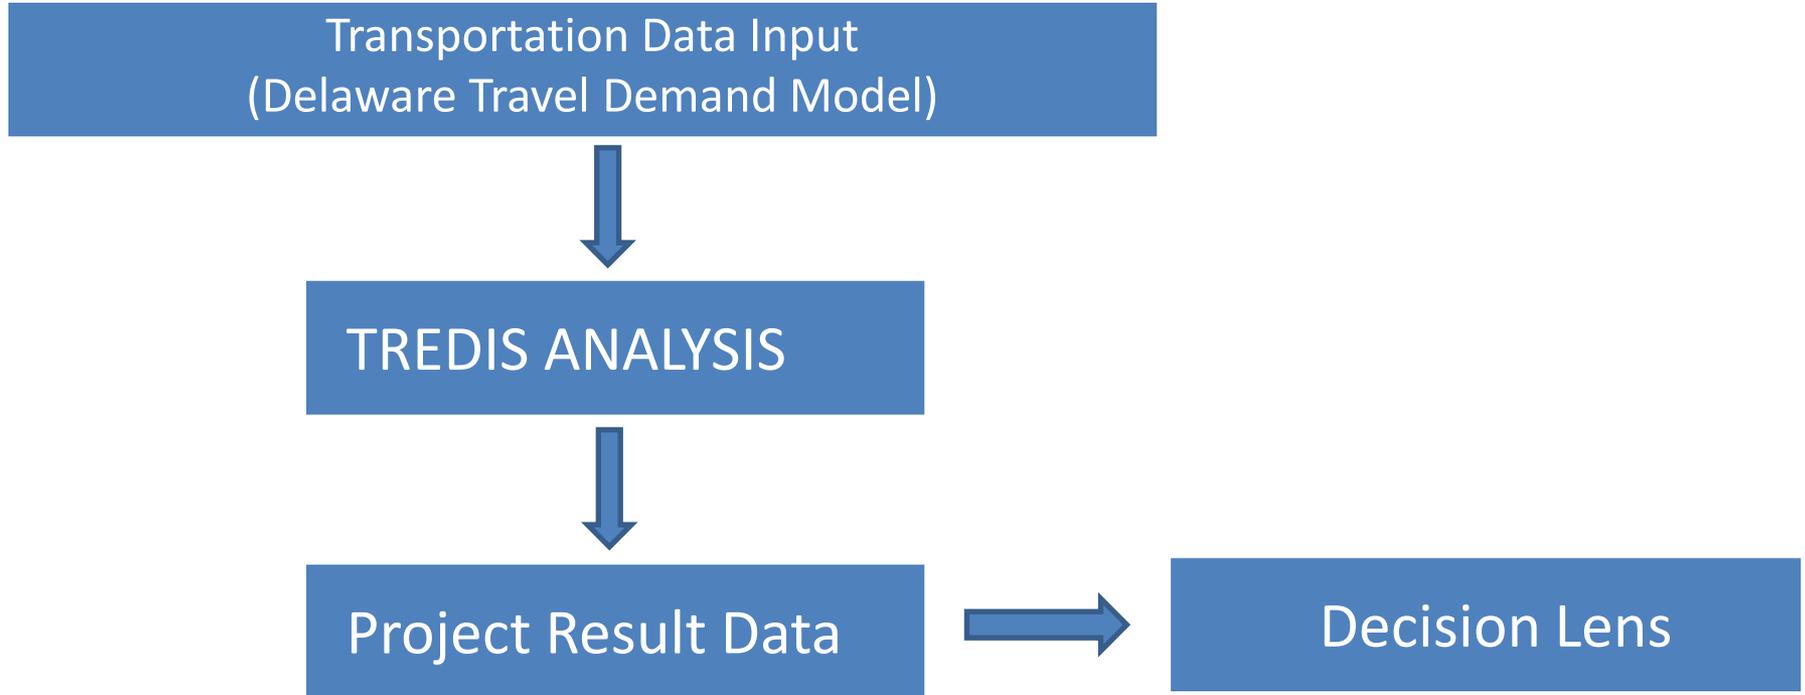

TREDIS® is highly precise

Directly used in
DeIDOT Freight Plan

- Trusted Data Sources
 - IMPLAN
 - Moody's
 - FAF
 - WiserTrade
 - ESRI
- Expanded Freight Data Sets
 - vFreight
 - Transearch
- Consistently Updated
- Customized Spatial Detail

- Multimodal Analyses
- Addresses All Modes
 - Road, Rail, Aviation, Marine, Pedestrian, Bicycles, Custom
- Dynamic Multi-year Travel Characteristics
- Different Growth Rates for Trips, Mileage, Travel Time
- Expanded Forecast Year
- Market Access Measures
- Workforce Migration Effects

How is TREDIS applied?

Economic Impact Analysis (EIA), in its common form, portrays the expected change in the economy of a designated area (region, state or nation) at future points in time. For transportation projects, this can be useful for identifying both the short-term and long-term consequences of projects.

- Short-term consequences tend to be those associated with construction activities.
- Long-term consequences tend to be those associated with cumulative economic growth generated in future years because of changes in productivity and competitiveness (attributable to changes in transportation conditions)

Economic Impact Assessment

▶ Project Result Data for Decision Lens Inputs

- 50% – Future year percentage change in employment
- 50% – Future year percentage change in economy
 - $\frac{\text{XX-year GDP added by the project}}{\text{XX-year level of value in the baseline economy}}$
- **Compare the percentage change in employment and economy of each project and rank them accordingly by county**
- **Selected Sussex County Projects for Demo**
